

## ABSTRACT

There is provided a system for dispensing a plurality of perforated  
wipes having a perforation detach strength characteristic. The system  
5 includes a dispenser having a dispensing force characteristic and including a  
sealable chamber. The chamber is configured to retain the plurality of  
perforated wipes therein. A dispensing opening is in communication with the  
chamber. The opening is adapted to dispense wipes from the plurality of  
perforated wipes through the opening and out of the dispenser. A wiper blade  
10 is positioned in the dispenser to engage at least a portion of the wipes as the  
wipes dispense through the opening. When dispensing, a ratio of the  
perforation detach strength characteristic to the dispensing force  
characteristic is greater than 1:1.
